

The guideline for your FINAL term research projects ECON 360

(Individual projects on the assigned national stock markets)

Requirements:

- Using *stationary or non-stationary* time series data
- Use quarterly data
- Applying estimation tools to univariate, bivariate, multivariate time-series models or panel data models

Oral presentation:

- Each student will give a 5-10 minute presentation on **Dec 4 & 6** (Week #10) for the Final term projects
- Followed by brief Q&A session
- Presentation format:
 - Motivation, research question and testing hypothesis
 - Theory and literature survey on what have been done on the issue (brief, to justify your research question)
 - Description of data
 - Research methodology (what econometric tools you are using)
 - Empirical finding and interpretation
 - Policy implications / takeaway
- Presentation skill:
 - to keep eye contact,
 - do not just read. You will tell your story,
 - deliver the main messages of *your own*,
 - keep time.
- **Due for your research package submission (4 pieces):**
 - **5:00 pm, Friday, Dec 8**; no extension is allowed.
 - **One data file (Excel), one EViews program file, and one PPT file**
 - **A one-page executive summary**
